

Department of Defense

§ 1108.70

payment schedule, before the recipient or subrecipient disburses the funds for project or program purposes.

§ 1108.35 Advanced research.

Advanced research means advanced technology development that creates new technology or demonstrates the viability of applying existing technology to new products and processes in a general way. Advanced research is most closely analogous to precompetitive technology development in the commercial sector (*i.e.*, early phases of research and development on which commercial competitors are willing to collaborate, because the work is not so coupled to specific products and processes that the results of the work must be proprietary). It does not include development of military systems and hardware where specific requirements have been defined. It is typically funded in Advanced Technology Development (Budget Activity 3) programs within DoD's Research, Development, Test and Evaluation (RDT&E) appropriations.

§ 1108.40 Agreements officer.

Agreements officer means a DoD official with the authority to enter into, administer, and/or terminate technology investment agreements.

§ 1108.45 Applied research.

Applied research means efforts that attempt to determine and exploit the potential of scientific discoveries or improvements in technology, such as new materials, devices, methods and processes. It typically is funded in Applied Research (Budget Activity 2) programs within DoD's Research, Development, Test and Evaluation (RDT&E) appropriations. Applied research often follows basic research but may not be fully distinguishable from the related basic research. The term does not include efforts whose principal aim is the design, development, or testing of specific products, systems or processes to be considered for sale or acquisition, efforts that are within the definition of "development."

§ 1108.50 Approved budget.

Approved budget means, in conjunction with a DoD Component award to a

recipient, the most recent version of the budget the recipient submitted, and the DoD Component approved (either at the time of the initial award or subsequently), to summarize planned expenditures for the project or program under the award. It includes:

(a) All Federal funding made available to the recipient under the award to use for project or program purposes.

(b) Any cost sharing or matching that the recipient is required to provide under the award.

(c) Any options that have been exercised but not any options that have not yet been exercised.

§ 1108.55 Assistance.

Assistance means the transfer of a thing of value to a recipient to carry out a public purpose of support or stimulation authorized by a law of the United States (see 31 U.S.C. 6101(3)). Grants, cooperative agreements, and technology investment agreements are examples of legal instruments that DoD Components use to provide assistance.

§ 1108.60 Award.

Award means a grant, cooperative agreement, technology investment agreement, or other nonprocurement instrument subject to one or more parts of the DoDGARs. Within each part of the regulations, the term includes only the types of instruments subject to that part.

§ 1108.65 Award administration office.

Award administration office means a DoD Component office that performs post-award functions related to the administration of grants, cooperative agreements, technology investment agreements, or other nonprocurement instruments subject to one or more parts of the DoDGARs.

§ 1108.70 Basic research.

Basic research means efforts directed toward increasing knowledge and understanding in science and engineering, rather than the practical application of that knowledge and understanding. It typically is funded within Basic Research (Budget Activity 1) programs within DoD's Research, Development,

§ 1108.75

Test and Evaluation (RDT&E) appropriations. For the purposes of the DoDGARs, basic research includes:

(a) Research-related, science and engineering education and training, including graduate fellowships and research traineeships; and

(b) Research instrumentation and other activities designed to enhance the infrastructure for science and engineering research.

§ 1108.75 Capital asset.

Capital asset means a tangible or intangible asset used in operations having a useful life of more than one year which is capitalized in accordance with GAAP. Capital assets include:

(a) Land, buildings (facilities), equipment, and intellectual property (including software) whether acquired by purchase, construction, manufacture, lease-purchase, exchange, or through capital leases; and

(b) Additions, improvements, modifications, replacements, rearrangements, reinstallations, renovations or alterations to capital assets that materially increase their value or useful life (not ordinary repairs and maintenance).

§ 1108.80 Claim.

Claim means a written demand or written assertion by one of the parties to an award seeking as a matter of right, the payment of money in a sum certain, the adjustment or interpretation of an award term or condition, or other relief arising under or relating to the award. A routine request for payment that is not in dispute when submitted is not a claim. The submission may be converted to a claim by written notice to the grants or agreements officer if it is disputed either as to liability or amount or is not acted upon in a reasonable time.

§ 1108.85 Cognizant agency for indirect costs.

Cognizant agency for indirect costs means the Federal agency responsible for reviewing, negotiating, and approving cost allocation plans and indirect cost proposals on behalf of all Federal agencies. The cognizant agency for indirect costs for a particular entity may be different than the cognizant agency

2 CFR Ch. XI (1–1–24 Edition)

for audit. The cognizant agency for indirect costs:

(a) For an institution of higher education, nonprofit organization, State, local government, or Indian tribe is assigned as described in the appendices to 2 CFR part 200. See 2 CFR 200.19 for specific citations to those appendices.

(b) For a for-profit entity, normally will be the agency with the largest dollar amount of pertinent business, as described in the Federal Acquisition Regulation at 48 CFR 42.003.

§ 1108.90 Contract.

Contract means a procurement transaction, as that term is defined in this subpart. A contract is a transaction into which a recipient or subrecipient enters. It is therefore distinct from the term “procurement contract,” which is a transaction that a DoD Component awards at the prime tier.

§ 1108.95 Contracting activity.

Contracting activity means an activity to which the Head of a DoD Component has delegated broad authority regarding acquisition functions pursuant to 48 CFR 1.601.

§ 1108.100 Contracting officer.

Contracting officer means a DoD official with the authority to enter into, administer, and/or terminate procurement contracts and make related determinations and findings.

§ 1108.105 Contractor.

Contractor means an entity to which a recipient or subrecipient awards a procurement transaction (also known as a contract).

§ 1108.110 Cooperative agreement.

Cooperative agreement means a legal instrument which, consistent with 31 U.S.C. 6305, is used to enter into the same kind of relationship as a grant (see definition of “grant” in this subpart), except that substantial involvement is expected between DoD and the recipient when carrying out the activity contemplated by the cooperative agreement. The term does not include “cooperative research and development agreements” as defined in 15 U.S.C. 3710a.
