

Department of Defense

§ 1108.70

payment schedule, before the recipient or subrecipient disburses the funds for project or program purposes.

§ 1108.35 Advanced research.

Advanced research means advanced technology development that creates new technology or demonstrates the viability of applying existing technology to new products and processes in a general way. Advanced research is most closely analogous to precompetitive technology development in the commercial sector (*i.e.*, early phases of research and development on which commercial competitors are willing to collaborate, because the work is not so coupled to specific products and processes that the results of the work must be proprietary). It does not include development of military systems and hardware where specific requirements have been defined. It is typically funded in Advanced Technology Development (Budget Activity 3) programs within DoD's Research, Development, Test and Evaluation (RDT&E) appropriations.

§ 1108.40 Agreements officer.

Agreements officer means a DoD official with the authority to enter into, administer, and/or terminate technology investment agreements.

§ 1108.45 Applied research.

Applied research means efforts that attempt to determine and exploit the potential of scientific discoveries or improvements in technology, such as new materials, devices, methods and processes. It typically is funded in Applied Research (Budget Activity 2) programs within DoD's Research, Development, Test and Evaluation (RDT&E) appropriations. Applied research often follows basic research but may not be fully distinguishable from the related basic research. The term does not include efforts whose principal aim is the design, development, or testing of specific products, systems or processes to be considered for sale or acquisition, efforts that are within the definition of "development."

§ 1108.50 Approved budget.

Approved budget means, in conjunction with a DoD Component award to a

recipient, the most recent version of the budget the recipient submitted, and the DoD Component approved (either at the time of the initial award or subsequently), to summarize planned expenditures for the project or program under the award. It includes:

(a) All Federal funding made available to the recipient under the award to use for project or program purposes.

(b) Any cost sharing or matching that the recipient is required to provide under the award.

(c) Any options that have been exercised but not any options that have not yet been exercised.

§ 1108.55 Assistance.

Assistance means the transfer of a thing of value to a recipient to carry out a public purpose of support or stimulation authorized by a law of the United States (see 31 U.S.C. 6101(3)). Grants, cooperative agreements, and technology investment agreements are examples of legal instruments that DoD Components use to provide assistance.

§ 1108.60 Award.

Award means a grant, cooperative agreement, technology investment agreement, or other nonprocurement instrument subject to one or more parts of the DoDGARs. Within each part of the regulations, the term includes only the types of instruments subject to that part.

§ 1108.65 Award administration office.

Award administration office means a DoD Component office that performs post-award functions related to the administration of grants, cooperative agreements, technology investment agreements, or other nonprocurement instruments subject to one or more parts of the DoDGARs.

§ 1108.70 Basic research.

Basic research means efforts directed toward increasing knowledge and understanding in science and engineering, rather than the practical application of that knowledge and understanding. It typically is funded within Basic Research (Budget Activity 1) programs within DoD's Research, Development,
